## Professional Summary

I'm a UI/UX Developer with over 3 years of experience in designing and building websites and applications that are easy to use and visually clear. I've worked on early-stage products, handled UI from scratch, and developed frontend features using React and Tailwind CSS. I've also built design systems, worked with design teams, and helped guide interns. I prefer simple, usable interfaces backed by user feedback and a clean codebase. In my free time, I've also guided aspiring designers and developers by sharing practical knowledge on UI patterns, frontend workflows, and UX laws.

## Skills

Design: UI/UX Design, Wireframing, Prototyping, Visual Hierarchy, Layout, Accessibility

Development: HTML, CSS, JavaScript, React.js, Tailwind CSS, Responsive Design

Tools: Figma, Adobe XD, Git, VS Code, Vite, Webpack

Other: Design Systems, Mobile-First Design, Collaboration with Product & Dev Teams, Animation (GSAP, Framer Motion), Agile Workflow

## Education & Certification

UI/UX Design Bootcamp – upGrad (Jan 2024)

M.Sc. in Computer Applications – Swami Vivekanand Subharti University, 2022

B.Com. – Sam Higginbottom University of Agriculture, Technology and Sciences, 2019

## Work Experience

### MelpApp – UI Developer | 2025 – Present

- Updated the platform's UI for better mobile performance and visual structure
- Worked with backend developers to connect designs with live data
- Helped maintain consistency across different sections of the app

### Webiosis Systems – UI/UX Developer | 2024 – 2025

- Designed the full UI for a school ERP system, from wireframes to final screens
- Created and documented a component library for future use
- Taught interns core Laws of UX with real examples, helping them understand design behavior and consistency
- Developed the frontend using React and Tailwind with reusable, modular code

### Yetticate Solutions – Web Developer | 2022 – 2024

- Improved user flows like onboarding and lead capture in a real estate CRM product
- Turned Figma designs into responsive UI with React and Tailwind
- Built reusable components and layout structures for admin dashboards

## **Adaan Digital – Web Designer | 2022**

- Migrated static websites to platforms like WordPress and Duda
- Applied small design changes to improve readability and layout flow
- Coordinated with the content team to make sure designs matched client needs

## **Projects**

### **RedBus UX Case Study – Visibility of System Status**

- A case study showing how unclear feedback can confuse users during onboarding.
- Illustrated the issue using comic-style panels.
- Suggested small UX changes like progress bars and alerts to improve user confidence.

### **Wanderlust Woof – Pet Travel UX Case Study**

- A complete design thinking project for pet-friendly trip planning.
- Created personas and mapped user journeys.
- Built wireframes and tested them using Maze.
- Focused on solving safety and convenience issues for pet travelers.

### **Personal Portfolio Website**

- A clean, fast website that showcases my projects, resume, and contact info.
- Designed and built using React, Tailwind, and Vite.
- Link: <https://www.himanshurawat.in>

### **I Am Art – Photography Portfolio**

- A lightweight gallery site with scroll effects and minimal design.
- Link: <https://iamart-1mv556vcg-himanrawats-projects.vercel.app/>

### **Last3Feet – Marketing Portfolio Website**

- Company website with light/dark mode and modern layout.
